No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

NUMBER 1, SEPTEMBER 1988

LORNA A. MURPHY, ALEXANDER POLLATSEK, AND ARNOLD D. WELL. Developmental Dyslexia and Word Retrieval Deficits	1
GABRIELE MICELI AND ALFONSO CARAMAZZA. Dissociation of Inflectional and Derivational Morphology	24
PHILLIP J. HOLCOMB. Automatic and Attentional Processing: An Event-Related Brain Potential Analysis of Semantic Priming	66
SUSAN JERGER, RANDI C. MARTIN, AND FRANCIS J. PIROZZOLO. A Developmental Study of the Auditory Stroop Effect	86
JANICE MURRAY, FRAN ALLARD, AND M. P. BRYDEN. Expectancy Effects: Cost-Benefit Analysis of Monaurally and Dichotically Presented Speech.	105
RICHARD K. PEACH, GERALD J. CANTER, AND ALAN J. GALLAHER. Comprehension of Sentence Structure in Anomic and Conduction Aphasia	119
ROGER L. TOWNE AND MICHAEL A. CRARY. Verbal Reaction Time Patterns in Aphasic Adults: Consideration for Apraxia of Speech	138
GAYLE V. KLOUDA, DONALD A. ROBIN, NEILL R. GRAFF-RADFORD, AND WILLIAM E. COOPER. The Role of Callosal Connections in Speech Prosody	154
DAVID N. LEVINE, RANJIT B. MANI, AND RON CALVANO. Pure Agraphia and Gerstmann's Syndrome as a Visuospatial-Language Dissociation: An Experimental Case Study.	172
PAPERS TO APPEAR IN FORTHCOMING ISSUES	197

NUMBER 2, NOVEMBER 1988

JACK GANDOUR, SORANEE HOLASUIT PETTY, AND ROCHANA DARDARANANDA. Perception and Production of Tone in Aphasia	201
D. GALIN, J. HERRON, J. JOHNSTONE, G. FEIN, AND C. YINGLING. EEG Alpha Asymmetry in Dyslexics during Speaking and Block Design Tasks	241
ANDREW W. ELLIS, ANDREW W. YOUNG, AND CHRISTINE ANDERSON. Modes of Word Recognition in the Left and Right Cerebral Hemispheres	254
LUCIO POSTERARO, PATRIZIA ZINELLI, AND ANNA MAZZUCCHI. Selective Impairment of the Graphemic Buffer in Acquired Dysgraphia: A Case Study	274
DAVID P. ROELTGEN AND DAVID M. TUCKER. Developmental Phonological and Lexical Agraphia in Adults	287

DEBORAH L. CROSSMAN AND JOHN POLICH. Hemispheric Differences for Orthographic and Phonological Processing	301
ROBERT C. MARSHALL, JACK GANDOUR, AND JENNIFER WINDSOR. Selective Impairment of Phonation: A Case Study	313
WILLIAM F. KATZ. Anticipatory Coarticulation in Aphasia: Acoustic and Perceptual Data	340
NOTES AND DISCUSSION	
HARVEY M. SUSSMAN, THOMAS P. MARQUARDT, PETER F. MACNEILAGE, AND JUDASE A. HUTCHINSON. Anticipatory Coarticulation in Aphasia: Some Methodological Considerations	369
WILLIAM F. KATZ. "Methodological Considerations" Reconsidered: Reply to Sussman et al. (1988).....	380
PAPERS TO APPEAR IN FORTHCOMING ISSUES	386
AUTHOR INDEX FOR VOLUME 35	390

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews, and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery, and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Submission of Manuscripts. Manuscripts should be submitted to:

Brain and Language
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11-in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,^{1,2}, etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1980) or (Russell & Espir, 1981). If more than one paper was published by the same author in a given year, the correct style is Broca (1982a) or (Broca, 1982b).

References should be listed alphabetically; typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Fromkin, V. 1980. *Errors in linguistic performance*. New York: Academic Press.

Efron, R., Snyder, E., Yund, E. W., & Martin, F. 1983. Central auditory processing. VI. Detecting ear dominance by evoked potentials. *Brain and Language*, **20**, 54-64.

Bryden, M. P. 1978. Strategy effects in the assessment of hemispheric asymmetry. In G. Underwood (Ed.), *Strategies of information processing*. New York/London: Academic Press.

(Use underlining for journal and book titles only.)

Proofs. Proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
